Regulations relating to the protection of the Indre Wijdefjorden National Park in Svalbard1
Table of Contents2

Legal basis: Adopted by Royal Decree on 9 September 2005 pursuant to the Act of 15 June 2001 no. 79 relating to the protection of the environment in Svalbard (Svalbard Environmental Protection Act), Section 12, Section 16, Section 21 and Section 22. Proposed by the Ministry of Environment (now the Ministry of Climate and Environment).

Amended by the Regulations of 15 March 2013 no. 284, 19 December 2013 no. 1757, 4 April 2014 no. 378, 3 December 2021 no. 3395.

Amended by the Regulations of 9 February 2024 no. 230 (entry into force on 1 January 2025).

Section 1. Protection

An area at Indre Wijdefjorden in Svalbard is protected as a national park under the name Indre Wijdefjorden National Park.

Section 2. Boundary delimitation and scope

The protected area comprises the inner part of Wijdefjorden with adjacent land areas on both sides of the fjord.

The National Park comprises approximately 745 km² of land area (including glaciers and freshwater) and approximately 382 km² of marine area and affects cadastral unit number 1.

The boundaries of the National Park are shown in the attached map at a scale of 1:220,000, dated September 2005 by the Ministry of Environment. Coordinates shall be given for the break points.

The map and protection regulations shall be stored with the Governor of Svalbard, the Norwegian Environment Agency and the Ministry of Climate and Environment.

Section 3. Purpose

The purpose of protecting the areas is to preserve a vast, continuous and virtually untouched arctic fjord landscape with intact habitats, ecosystems, species, natural ecological processes, landscapes and cultural heritage, as an area for research and for the experiencing of Svalbard's natural and cultural heritage. The protection is particularly intended to safeguard:

- areas with a unique and rare vegetation (High Arctic steppe vegetation) and with several rare plant species;
- the inner parts of Wijdefjorden; an inlet with a unique and scientifically interesting cold-water basin.

Section 4. Protection provisions

1. Landscape and natural environment

1.1 No activities may be undertaken that may permanently affect the landscape or natural environment, such as the construction of buildings, installations, including tank farms, and permanent installations, the installation of barracks or similar structures, laying of pipes and cables, extraction, deposit, relocation, and storage of earth masses, levelling, construction of roads, quays, landing sites, etc., dredging of the seabed or scraping of the soil surface, draining and other forms of reclaiming, boring, blasting, or similar activities, and the extraction of minerals, oil, and fossils.

1.2 The provision in Section 1.1. does not preclude:

- fishing and trapping in accordance with the provisions of the Act relating to sea-water fisheries.

2. Flora and fauna

2.1 The flora is protected against all forms of harm and destruction that are not caused by permitted access and passage.

2.2 The introduction of plant species, including genetically modified species and forms, is prohibited.

2.3 The fauna is regulated by Chapter IV of the Svalbard Environmental Protection Act and Section 4 of the Svalbard Act and related decisions.

3. *Cultural Heritage*

3.1 Cultural heritage in the area is regulated by Chapter V of the Svalbard Environmental Protection Act and related decisions.

4. *Access and passage*

4.1 All access and passage shall occur in such a manner that it does not harm or in any other way damage the natural environment or cultural heritage or result in unnecessary disturbance to people or fauna.

Any person accessing or staying in the protected area shall prevent the occurrence of new, permanent tracks or wear and tear to the terrain or cultural heritage. Rocks, logs and other items used at the site shall be cleared and returned to the location where they were found. Sufficient distance shall be maintained in relation to:

- fauna, to avoid unnecessary disturbance;
- protected cultural heritage that is not in use, to ensure that such sites are not exposed to trampling or other activities resulting in a risk of damage.

Cycling is only permitted on frozen and snow-covered ground.

4.2 Landing in connection with tourist activities is prohibited.

4.3 Erecting tents and camping activities are regulated by the Svalbard Environmental Protection Act and the regulations issued pursuant to the Act.

4.4 Off-road motor traffic on ground that is not snow-covered and on thawed ground is prohibited.

Off-road motor traffic on frozen and snow-covered ground and motor traffic on river systems and at sea are regulated by the Svalbard Environmental Protection Act and the regulations issued pursuant to the Act.

4.5 Landing of aircraft is prohibited. It is prohibited to fly closer than one nautical mile from large, known concentrations of mammals and birds. This prohibition also applies to overflight of the areas above at altitudes below 300 metres and out to one nautical mile from land. The prohibition against overflight applies to the extent weather conditions permit.

4.6 Ships that call in the marine area of the National Park may not have more than 200 passengers on board.

4.7 The Norwegian Environment Agency may issue regulations prohibiting/regulating any access and passage in all or parts of the National Park if this is considered necessary in order to avoid disturbance to fauna or wear and tear on vegetation or cultural heritage.

5. *Pollution*

5.1 All pollution to air, water or soil that causes or may cause damage or nuisance to the environment is prohibited, except for pollution that is caused by permitted motor traffic.

5.2 Abandoning or disposing of waste is prohibited.

5.3 Substances and objects that may harm the flora and fauna, which are unsightly or that may entail a risk of pollution must not be stored or abandoned.

6. The use of unmanned vehicles (drones) and other remote-controlled or autonomous unmanned devices in the air, on the ground, on and beneath the surface of the water is prohibited.

Section 5. *General exceptions*

The provisions in Section 4 do not preclude:

- emergency response for fire, police or rescue services and inspection or supervision in accordance with the Svalbard Environmental Protection Act, Section 77 and Section 87.
- the use of unmanned vehicles (drones) and devices as mentioned in Section 4(6), for the same purposes as mentioned in the previous sub-item and for use in the tasks of the management authority.

Section 6. *Exemptions/permits*

Within the framework of the Svalbard Environmental Protection Act, the management authority may grant permission for:

- renovation and minor extensions to existing buildings;
- reconstruction of buildings that have been destroyed by fire or natural disaster;
- measures as mentioned in Section 4(1) in connection with the establishment and operation of hunting stations;
- the use of unmanned vehicles (drones) and devices as mentioned in Section 4(6) for purposes other than recreational and hobby activities.

In addition to the measures mentioned in the first paragraph, the management authority may, when scientific or other special reasons so indicate, grant exemptions from the protection provisions in Section 4.

Permits or exemptions mentioned in the first and second paragraph may only be granted provided this does not conflict with the purpose of the protection regulations and will not have a significant impact on the conservation value of the area.

In an exemption/permit, the grounds for the decision shall include an account of how the management authority has assessed the impact the exemption/permit may have on the environment and the weight that has been attached to this.

Section 7. *Management*

The management authority or the instance so authorised by the management authority may implement management measures to promote the purpose of the protection. A plan containing more detailed guidelines for the implementation of such measures may be drawn up. The plan shall be approved by the Norwegian Environment Agency in consultation with the Norwegian Directorate for Cultural Heritage.

0 **Amended** by the Regulations of 15 March 2013 no. 284 (entry into force on 1 July 2013).

Section 8. *The management authority*

The Governor of Svalbard is the management authority pursuant to these Regulations.

Section 9. *Penalties*

Any person who wilfully or negligently contravenes provisions laid down in or under these Regulations is liable to fines or to a term of imprisonment not exceeding one year. If a risk of substantial environmental damage has occurred or been caused or if there are especially aggravating circumstances, a term of imprisonment not exceeding three years may be imposed. An accomplice is liable to the same penalties.

Section 10. *Entry into force*

These Regulations enter into force immediately.
